

```
from collections import OrderedDict
```

导入OrderedDict模块

```
from collections import OrderedDict
```

```
dicta = OrderedDict(name='Ten', age=26)
```

```
dicta['sex'] = '男'
```

```
dicta['addr'] = '动脑学院'
```

```
print(dicta)
```

```
for key, value in dicta.items():
```

```
    print(key, value)
```

有序字典，字典本来是无序的，该模块可以生成一个有序的字典
